

**GEODETIC SURVEY.**—The *Geelong Advertiser* says—  
“His Excellency the Governor, accompanied by the Chief Secretary, the President of Land and Works, the Postmaster-General, Captain Pasley, the Surveyor-General, and several other gentlemen, proceeded to Wyndham, for the purpose of fixing a *datum* or starting-point for the commencement of the geodetic survey. The company left the train at the Surveyor's Camp, about a mile on this side of the Werribee, where the initiatory rite was performed, as we believe, in a most satisfactory manner. A considerable stock of creature comforts accompanied the distinguished travellers, and, as we understand, the sparkling glass went its merry merry round in honor of the occasion. His Excellency and party returned to Melbourne by the last train.”
